

Web Developer

Forward-thinking web developer specializing in rapid application development with cutting-edge AI integrations via Model Context Protocol. Combines exceptional technical velocity with modern design sensibilities - creating polished, animated interfaces that captivate users while maintaining the performance standards that keep them engaged.

Leverages MCP servers to dramatically accelerate development workflows and boost productivity, enabling faster delivery of production-ready applications without compromising quality. Excels at transforming complex Figma designs into functional web experiences while collaborating effectively in agile environments to meet ambitious timelines.

Technical Proficiencies

Frameworks: Next.js, Express.js | **Libraries:** React, Vue | **Languages:** JavaScript, Typescript

Front-End: SASS, Tailwind CSS, Webpack | **Back-End:** Node.js, PHP | **Databases:** MongoDB, Firebase

Development Tools: Git/GitHub, Postman, Figma | **Testing:** Jest, Playwright | **AI:** Claude Code

Platforms: Framer, Webflow, WordPress, Shopify, HubSpot, Storyblok | **Emerging Tech:** Model Context Protocol

Professional Experience

StudioEast, London, UK

October 2023 – November 2025

Web Developer (remote)

Transformed agency development workflows and accelerated project delivery timelines while building diverse web solutions for small business and e-commerce clients across WordPress, Shopify and modern JavaScript frameworks.

- Architected and developed "Blueprint," an internal web builder tool using Next.js and Storyblok CMS, then leveraged this system alongside AI-powered MCP server workflows to reduce standard business site builds from weeks to days while delivering full-featured solutions including custom email server API integrations, modern animations, and sophisticated page structures.
- Built custom API integrations with Node.js and Express to connect CMS systems with front-end applications, creating reusable components and maintaining unified codebases that standardized development workflows across various platforms.
- Delivered diverse web solutions across multiple platforms and technology stacks including Blueprint-powered sites, Webflow and Framer builds, WordPress implementations, vanilla JavaScript projects, and custom React/Next.js applications - adapting

seamlessly to client needs and project requirements.

- Collaborated cross-functionally with designers and developers in a fast-paced agency environment, managing multiple concurrent projects for e-commerce and professional services clients while ensuring consistent code quality and timely delivery.

[Marv-dev, Glasgow, UK](#)

January 2022 – October 2023

[Freelance Web Developer](#)

Developed custom web solutions for freelance clients across e-commerce and business website projects, working with diverse technology stacks to deliver functional, user-focused applications.

- ⌘ Completed 20+ client projects across shops, consultancies, and as a subcontractor for digital agencies, delivering websites and web applications across WordPress, Shopify, React, and other technology stacks.
- ⌘ Translated Figma design specifications into production-ready code, implementing pixel-perfect interfaces and ensuring responsive functionality across devices and browsers.
- ⌘ Self-taught Shopify, WordPress, and Webflow platforms to deliver diverse client solutions, demonstrating rapid platform mastery and the ability to adapt to varied project requirements.

Education

[Postgraduate Certificate in Education \(PGCE\)](#)

Nottingham University, Nottingham, UK

[Bachelor of Science in Multimedia Engineering \(Hons\)](#)

Glasgow Caledonian University, Glasgow, UK

[Human Biological Science \(BA\)](#)

Glasgow University, Glasgow, UK

Portfolio Projects

[Kanban - Full Stack Agile Task Management Web App](#)

2023

Tech: React | Tailwind | Firebase | Redux | Figma | Node.js | Git | NPM

[TrailerView – Full Stack Entertainment Web App](#)

2023

Tech: Next.js | Tailwind | MongoDB | NextAuth | API | Node.js | MUI | Git | NPM
