

Full Stack Web Developer

I'm a web developer who builds fast, polished websites and applications. I work with React, Next.js, custom API integrations, and various CMS platforms to turn designs into working products. I use modern development tools and workflows to deliver projects efficiently without sacrificing quality.

I take ownership of features end-to-end: translating designs into production-ready interfaces, wiring up backend services, and iterating based on feedback and performance data. Strong foundation in web fundamentals, comfortable making technical decisions independently, and effective at collaborating with product and design teams to ship quality work.

Technical Proficiencies

Frontend: React, Next.js, TypeScript, JavaScript, Redux

Backend: Node.js, Express.js, REST APIs, PHP

Styling & UI: SASS, Tailwind CSS, Framer Motion, GSAP, CSS Modules

Platforms: WordPress, Shopify, Webflow, Framer, Storyblok CMS, Contentful CMS, Hubspot

Tools: Git/GitHub, Figma, Claude Code + MCP, Jest, Playwright | **Other:** MongoDB, Firebase, SEO tools (Screaming Frog, SEMrush, Google Analytics/GA4)

Professional Experience

Studio East [Design/Marketing Agency], London, UK

October 2023 — December 2025

Web Developer (remote)

Owned end-to-end delivery of web applications across React/Next.js, WordPress, and Shopify. Built and maintained client-facing and internal platforms, handling frontend implementation, API development, and third-party integrations.

- Built RESTful APIs with Node.js and Express to connect React frontends with headless CMS platforms (Storyblok,

WordPress), implementing authentication, caching, and data transformation layers.

- Developed shared component library with Framer Motion and GSAP animations—scroll effects, parallax, micro-interactions—adopted as the standard across all agency projects.
- Led technical decisions on stack selection per project—Next.js for public-facing content that needs to rank, React for apps behind auth, Webflow for marketing landing pages.
- Owned QA and performance optimisation—technical SEO audits, WCAG 2.1 accessibility testing, cross-browser validation. Maintained 95+ Lighthouse scores across performance, accessibility, and SEO.
- Built AI-augmented development pipeline integrating design-to-code tooling (Figma MCP), automated testing (Playwright), and debugging workflows—reduced project delivery time by 70%.

Freelance Web Developer

January 2021 — October 2023

Built and maintained websites for small businesses and online stores, working mainly with WordPress, Shopify, React, and Next.js. Took on both direct client projects and subcontractor work for agencies. Worked with designers, and copywriters to customise Shopify/WordPress themes. Turned Figma designs into working sites that matched what clients wanted.

- Delivered 20+ websites and e-commerce stores across WordPress, Shopify, React, and Next.js—mix of direct client work and agency subcontracting.
- Partnered with designers and copywriters to customize themes and translate Figma designs into pixel-perfect, responsive sites that met client requirements.
- Managed projects end-to-end: client communication, design implementation, CMS configuration, and deployment. Delivered on time across varying budgets and technical requirements.

International School IT teacher

May 2012 — February 2023

Taught IT at international schools across Korea, Vietnam, Thailand, Taiwan, and Japan. Developed curriculum for web

development and digital literacy while managing school technology infrastructure and supporting staff with technical needs.

Education

[Postgraduate Certificate in Education \(PGCE\) | 2018](#)

Nottingham University, Nottingham, UK

[Bachelor of Science in Multimedia Engineering \(Hons\) | 2012](#)

Glasgow Caledonian University, Glasgow, UK
